

AUDIT360™

A COMPLETE SECURITY AUDIT TOOL

WHY CHOOSE AUDIT360

- Revolutionize your aviation security compliance with our user friendly, digital airport AVSEC audit tool - record audits, track compliance and monitor trends.
- Produce great-looking, readable audit reports in the Audit360 cloud-platform, and stay compliant with all major international and national requirements.
- Tailor the system to what you need: airports, airlines, cargo, in-flight supplies and more. We have deep international process and standards expertise and can craft a solution right for your operations.

Designed and built by certified aviation security auditors. We understand your needs, we respond to your requirements.

WHAT IS AUDIT360

- A cloud based or local server operated secure website.
- Available with a pre-set of questions encompassing all ICAO Annex 17 AvSec requirements, or tailorable to country specific requirements.
- Intuitive interface, workflow, and reporting that is customizable to any organization's processes and reporting requirements.
- Accessible interface making it easier for staff to reference guidance materials and highlight or leave key findings.
- Admin console and user management console allowing the assignment of various user rights and responsibilities based on clients' organizational structure, execution, and validation processes.
- Full suite of support offered as per client's needs, including new audit methodology and country specific question sets, guidance materials, training, and mentoring.

THE DETAILS

- System is easily adaptable to current and future audit requirements including audit categories, hierarchy, roles, reporting and management of audit requirements.
- Deployed in an AWS (Amazon Web Service) secure cloud environment, SOC2 (cyber security) compliant, and Data Encryption at-rest and in-motion. Culmen International is NIST 800-171 compliant.
- Available in multiple languages.
- Offline mode available.
- On-premise solution is available.

Summary

Category	Count	%	Answered / All
Fully Compliant (FC)	0	0%	(0/26)
Improve (CID)	0	0%	(0/26)
Compliance Score	0%		(0/26)
Serious Deficiency (SD)	0	0%	(0/26)
Non compliant (NC)	0	0%	(0/26)

Information Not Included in the Score

Category	Count	Total
Not Applicable (NA)	0	0
Not confirmed (NOTC)	0	0

Immediate vulnerabilities to be addressed

0 / 500

Recommendations

0 / 500

1. General Airport Security

1.1.1. Is there an ASP providing sufficient detail for airport security

Compliance required

- Fully Compliant (FC)
- Compliant, improvement desirable (CID)
- Non compliant (NC)
- Non compliant with serious deficiency (SD)
- Not confirmed (NOTC)
- Not Applicable (NA)

Findings

Type findings here... 0 / 500

Considerations

- Is there an ASP
- Is it up to date
- Is it security classified and version controlled
- Are hard and soft copies of the ASP kept secure
- Does the ASP provide detailed guidance on airport access, staff screening and physical boundaries
