

AVIATION SECURITY

OUR WORK INCLUDES

- Deep SME knowledge of airports and aviation security standards
- Developing US Government approved aviation security curriculum and training materials
- Experience developing all relevant national strategy and airport-level standard operation procedures, and protocols as required to meet global and national standards
- Aviation and airport security training including cargo screening methods and international training of X-ray screening for passengers, bags, staff, and crew
- Audit capability including carrying out airport audits to ICAO or national requirements, development of audit methodology, auditor training and development of tailored audit platform tools
- Provision of innovative platforms from screener certification to equipment management
- On the job training and mentoring, and creation of local and national AvSec training centers
- Installation of relevant equipment including screening and perimeter security enhancements
- Site survey, design, regulation, and equipment lifecycle support for screening equipment at airports globally, including cargo, vehicle, hold baggage and passenger screening.
- Design an airport threat model that identifies the largest pathway threats including terrorist transit
- Global relationships with relevant aviation security vendors and international organizations
- Experience performing in CONUS and OCONUS environments

COMPREHENSIVE AVIATION SECURITY SOLUTIONS FOUNDED ON REAL-WORLD GLOBAL EXPERIENCE

Culmen International delivers comprehensive aviation security solutions to customers around the globe further strengthening the security of our nation and others. Our aviation security services are founded upon extensive experience, best business practices, innovation and operational consistency. We currently employ International Civil Aviation Organization (ICAO) certified trainers and auditors, along with multi-lingual former government aviation security specialists from across the globe.

As the implementer of US assistance programs in the MENA region, Culmen has extensive experience delivering aviation security solutions in fragile environments. Constantly adapting and innovating in response to various operating challenges, Culmen is delivering real, sustainable change for aviation security in Libya.

Additionally, our highly skilled employees have decades of experience procuring, storing, transporting, and installing security equipment. This includes checked baggage x-ray scanners, carry-on baggage x-ray scanners, walk-through metal detectors, chemical analyzers, explosives trace detectors, radiation detection equipment and a host of related equipment at airports, seaports, and land border crossings worldwide. Our personnel help speed TSA Pre✓® credentials to eligible passengers, including all steps in the process from applications to data corrections to adjudications.

Security and safety are our top priorities and Culmen is ready to assist any sized customer, anywhere around the globe.
