SUPERIOR PROGRAM MANAGEMENT SUPPORT

Government agencies must optimize the planning, analysis, and performance of their portfolios, programs, and projects while limited budgets and stakeholders require ever-improving performance. From planning through execution, every aspect of program and project performance must be measurable. To support these efforts Culmen International provides Multi-Functional Program and Engineering Management Support to include analysis of alternatives, process improvements to enhance readiness, research and analysis, and presentations for agency leadership, policy makers, and Congress. In addition, we support U.S. Government delegations overseas by providing advance preparation of issue papers and talking points and by contributing subject matter expertise essential for negotiations with foreign governments.

Culmen's program management office and systems engineering technical support services delivery teams provide the tools, methodologies, and people to ensure successful management and delivery of projects and programs.
